2nd GALESS Conference in Poland : an ultimate experience for all of us!

The second GALESS conference in Poland was an ultimate experience for all of us, students, guiding teams, and all our members and friends of the GALESS community. How to build everlasting relationships ? Just leave it to the Polish hospitality, with so much dedication in all the things they do, to make a conference successful and to make us all feel so comfortable. With special thanks to Mrs. Wrobel and Mrs. Romaniuk, driving forces from the Kopernik School in Rybnik, Poland. Both of you: one of a kind.

Updating with Indonesian relations... , in The Netherlands.

Sometimes the occasion to meet elsewhere is there. Mrs. Monika Raharti (GALESS AC member) and head of Science from the Laurensia School, Mr. Welly Widjaja visited Holland in June this year. The Indonesian inspiration with a GALESS conference in Bali in 2024, a new conference of the Bina Bangsa School in Jakarta in 2027 and the increasing interest of Indonesian schools is a great asset in our community !

5th GALESS AC meeting in Poland : 2027 Conference presentations, 2027/2028 new research area: AI for sustainable solutions, and new Jury Board & AC members installed.

Another GALESS AC meeting in June in Poland was joined by delegates and invitees from all over the world : Poland, China, Japan, Spain, The Netherlands, Belgium and also (virtually) from the USA, Australia, Brazil, South Africa, Indonesia and Singapore. The subjects on the agenda can be found on the GALESS website : [GALESS Presentation AC Meeting](#)

Great inspiration in all our contacts in the AC meeting confirmed a great sense of solidarity and belonging in our GALESS community. It makes our AC meeting very special, time after time!

GALESS talented students catch the attention in our world with their research work. A great new opportunity in Oxford !

Could you be an Ellison Scholar?

Applications for the [undergraduate Ellison Scholars programme](#) will open in Spring 2027 for

those hoping to start at the University of Oxford in Autumn 2028!

The scholarship provides full funding for undergraduate studies at the University of Oxford, as well as a paid internship to work on [world-benefiting problems](#).

This is an opportunity for exceptional individuals to become global innovators of the future, solving humanity's most enduring problems through science and technology.

Find out more about one of the world's most generous scholarships: view an [Undergraduate Ellison Scholars Recorded Information Session](#) and [sign up to their newsletter](#) here.

If you require any further information, please email scholars@eit.org.

3rd Edition Australian Conference – A solid cooperation with MBGN, The Melbourne and Beyond Gifted Network, is a bright star in our GALESS community !

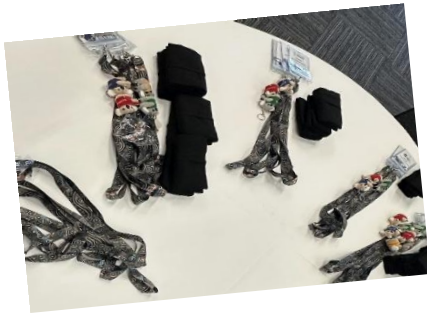

International cooperation within international cooperation, how does this look like ? We had a real international participation in the GALESS/MBGN conference in August with overseas teams

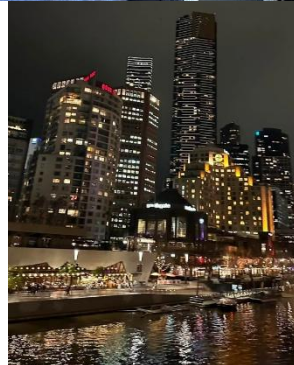

from Singapore, Indonesia and Poland. And on top of that: A remarkable situation where the Australian student research-teams were put together with a 'color' of nationalities itself. A flagship for cooperation in our community.

The special attention for the Design Thinking Process in the different research areas and the attention for micro-credentials in awarding student qualities, are examples of how Australian contributions in our educating system are brought to the attention to our full GALESS Community in the last years. The resulting research reports this year about "Minorities" showed so much empathy and engagement that microcredentials in this quality attitude seem to be connected to Gen Z ! And listen to one of our GALESS Jury Board members : The GALESS student groups are visibly improving their scientific skills and persuasive arguments year by year. The overall quality of the reports has advanced significantly since the initial GALESS initiative (MediCall).

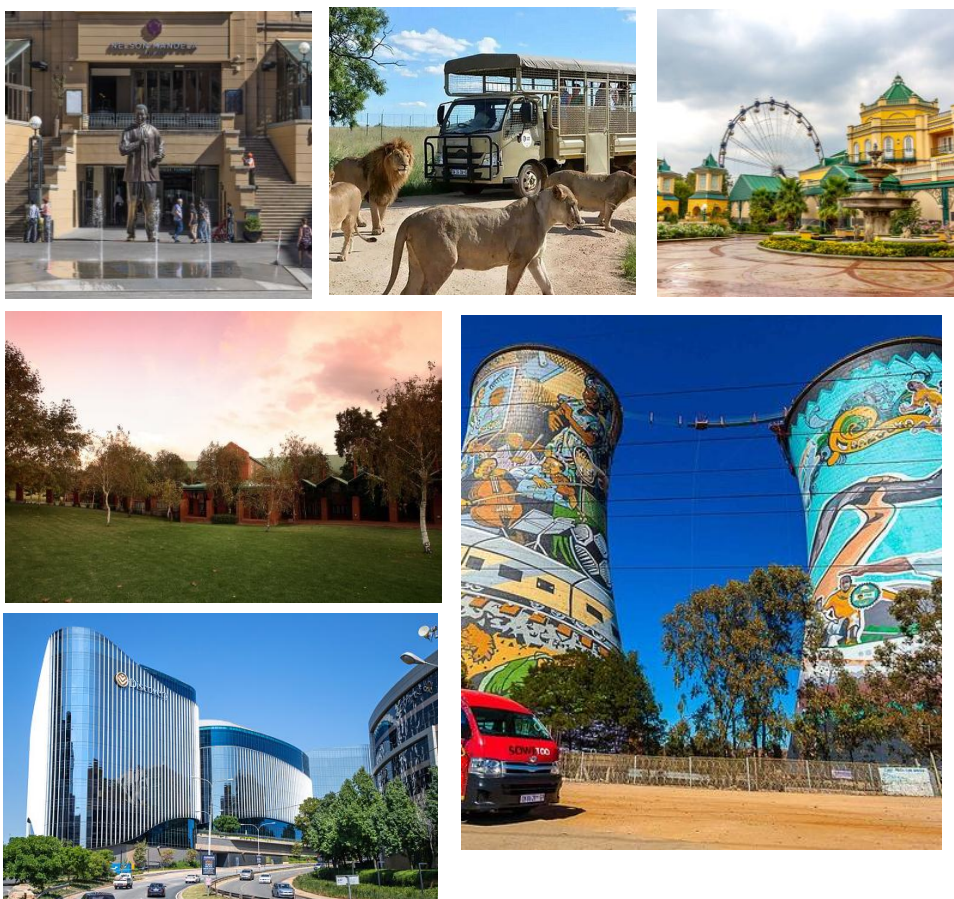

We are truly thankful to Mrs. Michele Linossier for being such a driving force to make this conference successful. The assistance of Amy, Geraldine, Georgia and Charlotte have been crucial during the preparation of this conference. A special thanks to them as well !

Start subscription GALESS Conference Johannesburg, July 2027

We recently opened the subscription for our first conference in 2027 in South Africa. Our organizing school-partner, The African Leadership Academy in Johannesburg, has made a very attractive offer for our GALESS Community. See our [Invitation Letter](#) and [Subscription Form](#). We hope to meet you in this first GALESS conference on the African continent !

Expected soon: Grand opening new GALESS cooperation initiative !

Soon to be revealed ... *GALESS China*. Read all the information about this new initiative in our Newsletter 13, Publication in November 2026.
