## PREPARATIONS OF A CONFERENCE

October week 43

GALESS director Hubert Schilling meets with the team of directors and several students of the hosting-school IV Liceum Ogólnokształcące im. Kopernika w Rybniku, to prepare the upcoming GALESS conference in June 2023.

Director Mrs Malgorzata Wrobel and her organizing team have covered many items regarding the organization, the conference program and the entire conference setting.

The student team had an excellent opportunity to talk about the research-requirements for the Energy Transition Challenge. The GALESS publication of the last Challenge "Medi-Call" helped them give a better impression of how to prepare their research-work. These students will be hosting partners in the Family Hosting Program in Poland, after first having traveled to Boston to present their research work over there.

The conference in Poland will be prepared in cooperation with Mr Bartosz Sobik and the University of Warsaw.

---

## PRESENTATION GALESS for our South American students

On November 9<sup>th</sup> 2022 members of our GALESS team were involved in a live stream on YouTube to inform students from Brazil about their participation in the GALESS research activities and conferences. This live stream has been recorded.

## NEW GALESS CONFERENCE at BALI, INDONESIA

The premonition was there and undoubtedly some of you may have been looking forward to a GALESS conference initiative in Asia ...

Fortunately, thanks to Mrs Monika Raharti, member of the GALESS Advisory Council, initiatives for young students are always close by! In fact, the third GALESS conference about *Energy Transition* will be organized in Bali.

This edition is going to be a close cooperation between GALESS and CYS (Center for Young Scientists) and will be held in Indonesia in September 2023.

What an excellent opportunity to interact with our Indonesian students when the time comes! And the last few decades Mrs Monika Raharti has been the perfect example of leadership for young students. Being young at heart as she is, she is an expert in making young students feel comfortable in their efforts to make the most of international meetings.

## ... and a FOURTH CONFERENCE in MELBOURNE

### **BOROONDARA GIFTED NETWORK**

Michele Linossier and the organizing committee of the BGN (Boroondara Gifted Network) in Melbourne in Australia are the organizers of the 4<sup>th</sup> GALESS conference in 2023. This conference will be a co-production of GALESS and BGN in which the main target will be to bring together gifted students from Australia, New Zealand and Asia in research activities regarding Energy Transition.

Michele's energy can best be defined as a "sustainable energy resource" of sun, wind and character. This remarkable lady has been very active in international youth conferences, taking her students along all over the world and with a special eye for gifted students from any origin, colour, culture and background.

We are proud to have her in and we wish Michele a lot of success in this new GALESS organization effort in Melbourne!

## STUDENTS and TEACHERS...

With the upcoming Tiltshift Conferences in 2023, but also the new Global Learning Experiences organized by your own school, the Galess organisation is dying to hear from you: the “workers in the field”

To make the Newsletters and also the present Galess-site much more attractive, Galess wishes to invite our students and teachers to participate in sharing their experiences in written and visual material. That's also the reason why all Tiltshift hosting schools will be requested to call into existence their own editorial group of writers, photographers and filmmakers who know how to capture the atmosphere of youngsters enjoying the international challenge.

Naturally, all students are very welcome to share their personal impressions of any event on global sustainability with the Galess population. More news in our next edition !

---

from the Galess organisation:

## NEW DIRECTORS IN OUR GALESS TEAM

Mrs Leonor Clares and Mr Francesc Rubio have been familiar faces in international education for many years. Behind the screens they were the organizers of the 2019 Global Responsibility Conference in Terrassa/Barcelona at their Collegi Mare de Déu del Carme as well as of the recent Sitges conference in August.

Ever since the first contact at Manhattan College for Science and Mathematics in New York

some 10 years ago, a rich history of cooperation in very special projects has passed.

GALESS is extremely proud to welcome these new directors who are so dedicated to international cooperation, every day again.

Jeremy Newton,  
Senior Principal Misk Schools  
Riyadh Saudi Arabi

## JEREMY NEWTON joining the ADVISORY COUNCIL

From King's College School in Madrid where he was Deputy Head, Jeremy joined Misk Schools, Riyadh in August 2022.

During his five-year tenure at KCS, Jeremy demonstrated professional educational leadership from infant to senior year phases, playing an instrumental role in the successful development of KCS from a preparatory school of 500 students, to an all-through K-12 school of 900 students who are now achieving top academic outcomes.

*Jeremy: I look forward to meeting the other members of the advisory council in due course!*
