

The Dutch Minister of Health, Mr Kuipers received a first copy of the Research Book TiltShift challenge Medi Call (25 research-reports from 24 schools from all over the world) from a delegation of students, teachers and guiding GALESS team during an official session at the Ministry of VWS in the Hague on August 18, 2022.

Our representing student-team with students, in this case from Germany and Spain, was delighted about the intensive discussion and all the serious interest in their research-work!

Mr. Kuipers' comments:

*Corona had turned the lives of young people around the world upside down. That's why it is so important that these young people talk and think about it. It's about their future after all.*

*I have just met a few secondary students from Spain and Germany, who by way of GALESS (Global Alliance of Leading Edge Schools for Sustainability) have done a research based on complex dilemmas around Corona.*

*The students came to me to present their research reports from 24 schoolteams from all over the world.*

*The students I have spoken came with lots of interesting insights.*

*Therefore I will read the reports with great interest!*
